

Road Safety PIN Flash 19 - Background Tables Unprotected road users - a key concern of road safety

- Table 1** Road deaths since 2001 for pedestrians, cyclists, motorcyclists and other road users in the EU27.
- Table 2** Pedestrians' deaths and annual average percentage change in pedestrian deaths over the period 2001-2009.
- Table 2d** Pedestrians, cycle users and PTW users' deaths as a percentage of all road deaths ranked by the share of deaths that were unprotected road users of all kinds taken together (2007-2009 average).
- Table 3** Cyclists' deaths and annual average percentage change in cyclists' deaths over the period 2001-2009.
- Table 4** PTW deaths and annual average percentage change in PTW deaths over the period 2001-2009.
- Table 5** Average annual percentage change in PTW rider deaths (2001-2009) plotted against the average annual percentage change in PTW riders seriously injured (2001-2009).
- Table 6** Powered two-wheeler rider deaths per billion km ridden in 2009 (or last year available).
- Table 7** Moped rider deaths as a percentage of total PTW rider deaths (2007-2009 average).
- Table 8** Motorcycle helmet wearing rates.
- Table 9** Cycle helmet wearing rates.
- Table 10** Safety equipment requirements for cyclists.

EU27	2001	2002	2003	2004	2005	2006	2007	2008	2009	Reduction 2001/2009
