

## NEWS RELEASE

# EU Transport Ministers clinch deal to save lives on Europe's Roads

*2<sup>nd</sup> December 2010, Brussels* – ETSC <sup>(1)</sup> strongly welcomes the conclusions on a political agreement on road safety and the Cross Border Enforcement Directive <sup>(2)</sup> adopted at today's Transport Council by EU Transport Ministers. The main objective of the new Directive is to introduce a system of exchanging information to enable the follow up of road safety related traffic offences committed by non-resident drivers. The swift adoption of the Directive would introduce equal treatment of foreign and resident drivers and most important, save lives on Europe's roads <sup>(3)</sup>. In their conclusions Ministers also endorsed the new target to reduce road traffic deaths by 50% by 2020<sup>(4)</sup>.

ETSC supports the new Directive as it would result in higher levels of safety through enforcement <sup>(5)</sup>. Enforcement is a means to prevent collisions from happening by way of persuading drivers to comply with the safety rules. Deterrence is based on giving drivers the feeling that they run too high a risk of being caught when breaking the rules. This Directive in its current form will reduce the current annual death figure of 35,000 on Europe's roads. Moreover the Directive would ensure that the principle of fair and equal treatment will be applied also to non-residents who at present are acting with impunity and escaping punishment whilst travelling abroad <sup>(6)</sup>. This also undermines the credibility of the existing enforcement system in countries where the national law is respected by residents but not by visitors.

Ministers also adopted conclusions in response to the European Commission's "Road Safety Policy Orientations 2011-2020". Ministers stressed that the level of road deaths and injuries are unacceptably high and aim towards the long-term "zero-vision" <sup>(7)</sup> for European road transport safety. They also encouraged employers to prepare road safety action plans to reduce road traffic collisions occurring whilst driving for work <sup>(8)</sup>. Moreover they gave their support to new technical solutions to counters problems such as speeding and drink/drug driving. As set out in ETSC's Response <sup>(9)</sup> to the 2020 Strategy, ETSC would much welcome these additional measures especially to tackle the three main killers of speeding, drink driving and non use of seat belts.

*"Road safety is a matter affecting all EU citizens in their daily life. ETSC continues to give its strong support to the new Cross Border Enforcement Directive. With the swift adoption of this legislation and other road safety actions today the EU Presidency and Transport Ministers honour the renewed target of halving road deaths by 2020" said, Antonio Avenoso, ETSC Executive Director.*
