ETSC set up in 2006 the Road Safety Performance Index (PIN) as an instrument to spur European countries to greater efforts to enhance road safety. By comparing Member States' performance, it serves to identify and promote best practice in Europe and bring about the kind of political leadership that is needed to create what citizens deserve – a road transport system that offers all practicable safety.

The index currently includes the 27 EU Member States, as well as Israel, Norway, Serbia and Switzerland. The Road Safety PIN programme receives financial support from Volvo Group and Volvo Trucks. The PIN also receives financial support from the Swedish Road Administration, the Norwegian Public Roads Administration and Toyota Motor Europe. www.etsc.eu/PIN

To register to the PIN Conference, please send an email with your names and organisations to elena.gil@etsc.eu before the 15th of June.
